

### Words with the suffix ending in -gue and -que

There are a few extra words this week. You may want to study their meaning. Cut these out after studying them for a few moments separating the words from their definitions. Layout all of the words. Then, get an adult to read the definition to you and then find its matching word. You can reverse this getting the adult to say a word and you find its definition. **How many do you get correct?**
